Subject: "Settlement with Microsoft"!! HAH!

This a farce!! Microsoft has hurt so many people put out so much crap and computer soft ware that only marginally works because they dominate the market. This is not fair nor right. They need to be censured by the bigger "bully."

My Win 98 was rushed to the market and used to crash constantly, It's better now but still not reliab;le. I call it crash trash!!!

Their Hotmail system is so full of holes that I get trash and Spam all the time and I only used it to one person. I was getting the trash Spam before that.

Someone used Hotmail to put the Trojan Horse virus on my computer via my AOL account.

I screamed at Hotmail and they told me that after a visual inspection of that account's activity, that they would cancel it because they were surfing looking for passwords!!!

And it took manual intervention to do this!! The world's "premier" software company had to manually do this!!

Hotmail was free and anybody could get it with absolutely no verification of critical personal data. I asked them how they could be so irresponsible to allow such terrorist activity!!!

Break them up!!!!!! Sanction them!!! Fine them billions!!!
Teach the bastards a lesson.

They also do things like this constanmtly: put out a cheap imitation product, at low or no cost, run the competition out of business and then dominate.

They are too dominant and need to be taught a lesson!!
